Professional Summary

Computer Science student with strong problem-solving and leadership abilities, currently pursuing B.Tech in CSE after completing a Diploma. Hands-on experience in Python, SQL, web development, and computer vision projects. Proven ability to collaborate in teams, adapt to new technologies quickly, and deliver innovative solutions.

Skills

- Python, SQL, HTML, CSS, JavaScript, Machine Learning Basics, Git, Linux, OpenCV.
- Leadership, Collaboration, Problem Solving, Adaptability, Communication.

Projects & Training

Driver Drowsiness Detection System

- Spearheaded development of a real-time safety system using Python and OpenCV.
- Designed and tested algorithms to detect driver fatigue, enhancing road safety awareness.

Phishing URL Detection System

- Developed a classification model to detect malicious websites.
- Debugged and optimized preprocessing steps, improving detection accuracy.

Industrial Training — Pixel Quest

- Collaborated with developers on live projects during internship.
- Learned project workflows and contributed to debugging activities

Education

B.Tech, Artificial intelligence and machine learning— Sreenidhi Engineering College-
(Pursuing) -2025

Diploma, Computer Science & Engineering — Indur Institute of Engineering & tech -2022

Achievements & Activities

- Coordinated logistics and volunteer teams for a college-level Tech Fest, improving event flow.
- Participated in national-level hackathons, exploring IoT and AI-based solutions.
- Conducted peer workshops on cybersecurity basics and web development.

Strengths

Quick Learner | Team Player | Analytical Thinker | Innovative Mindset
